ICSR CASE PROCESSING STEPS REPORT

End-to-End Individual Case Safety Report Lifecycle

Ref Code: ICSR-STEPS-004
Standard: GVP Module VI / ICH E2B
Status: Final Draft

1. STEP-BY-STEP ICSR CASE PROCESSING WORKFLOW

Step #	Workflow Phase	Core Operational Activities	Primary Focus
Step 1	**Receipt & Triage**	Acknowledge source document; perform duplicate check; verify 4 minimum validity criteria; evaluate initial seriousness & reporting clock (Day 0).	VALIDITY & DAY 0
Step 2	**Data Entry & Coding**	Enter patient demographics, drug details, medical history; encode adverse event terms using MedDRA and drugs using WHO Drug Dictionary (WHODD).	MEDDRA STANDARDIZATION
Step 3	**Causality & Assessment**	Perform labeling evaluation against Reference Safety Information (RSI); evaluate drug-event causality using WHO-UMC or Naranjo scale.	EXPECTEDNESS & RELATEDNESS
Step 4	**Medical Review & QC**	Medical assessment by Safety Physician/Evaluator; review case narrative accuracy; finalize medical opinion and causality score.	QUALITY & MEDICAL SIGN-OFF
Step 5	**Reporting & Submission**	Generate XML/E2B file; submit report electronically to health authorities (FDA FAERS, EMA EudraVigilance, CDSCO) within mandatory timelines.	REGULATORY COMPLIANCE

2. ICSR MINIMUM FOUR VALIDITY CRITERIA

Criterion Element	Acceptable Identifiers	Validation Status
1. Identifiable Patient	Initials, patient ID number, age, age group, gender, or date of birth.	MANDATORY
2. Identifiable Reporter	Healthcare professional name, address, qualification, contact, or consumer details.	MANDATORY
3. Suspect Product	Brand name, generic name, active ingredient, or investigational drug code.	MANDATORY
4. Adverse Event	At least one reported sign, symptom, disease, or laboratory abnormality.	MANDATORY
